Technical Specifications

PRODUCT	SIZE	PART No.
Aluminium Post	48mm x 1.5m high	034703
Aluminium Backing Plates	205mm x 180mm	034628

Railway Datum Gauges

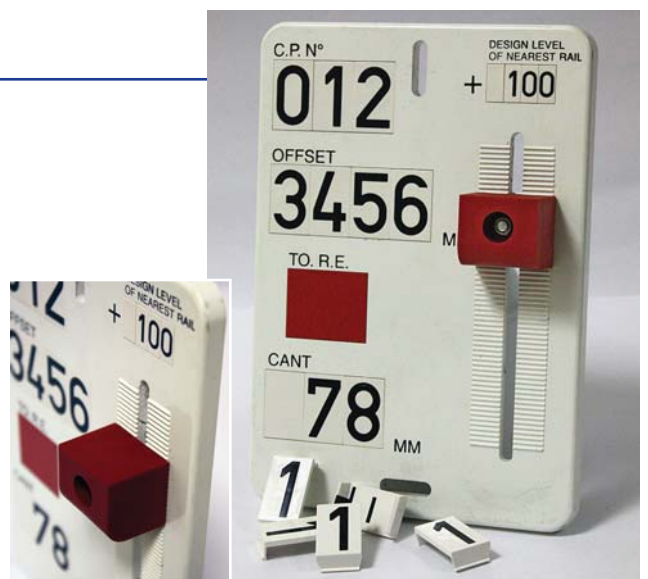

A plastic plate used to mark the correct level or position of the track. The plate is attached to a fixed object such as a platform or a bridge.

Each plate is manufactured from a durable plastic 'Luran S' and is supplied with a red/green block & slider and spaces for security snap fit inserts.

- Plate size: 140mm x 200mm

We can also provide steel, aluminium and plastic backing plates for secure fitting.

Each plate requires 12 x Snap fit 40mm inserts and 4 x 10mm inserts which we can provide at an extra cost.
