

## Deer Fencing

Deer fencing is a very high strength, lightweight 1.8m high deer fence manufactured from polypropylene. Deer have a tendency to forage over large areas and the cost effective deer fencing net offers a very effective deer control barrier. The deer fence is black, UV stabilised and rot proof and unobstructive as it merges into its background. Deer fencing is very quick and easy to erect and each roll weighs less than 15kg.

- Deer fence is easy to install
- The extruded net has a high tensile strength
- UV stabilised and chemical resistant
- Deer fencing is lightweight, less than 15kg/roll

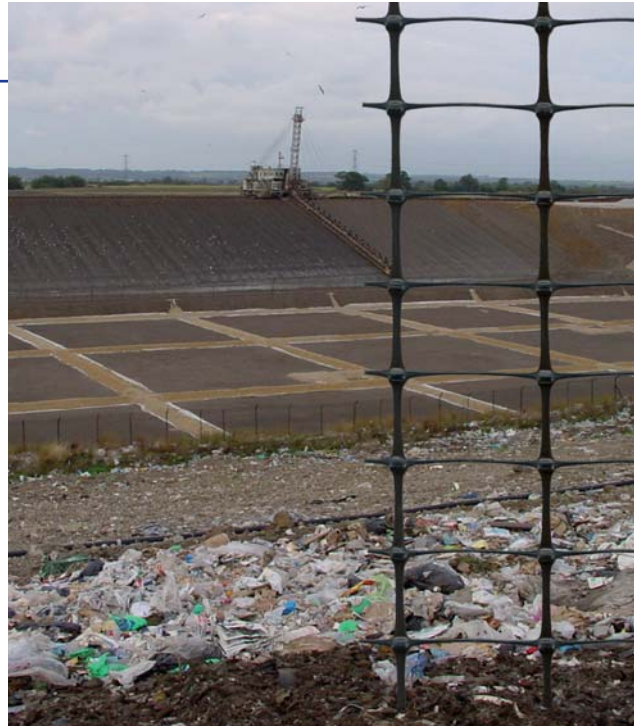

### Technical Specifications

PRODUCT	ROLL SIZE	MESH APERTURE	TENSILE STRENGTH @ MAX LOAD	WEIGHT/m <sup>2</sup>	MATERIAL	PART NO
	1.8m x 100m	50mm x 50mm	5.8kN/m(MD) 6.3kN/m(TD)	80g/m <sup>2</sup>	PP	051045

## Litter Fencing

Litter fencing is a high strength, lightweight netting manufactured from polypropylene. The extruded net is ideal to install on the perimeter of refuse or landfill sites to control areas where wind blown litter creates an unsightly problem and a health and safety issue to local communities. The litter fence is easy to erect and is an extremely cost effective solution for both temporary and permanent installations.

- Litter fencing is easy to install
- High tensile strength
- UV stabilised and chemical resistant
- Available in widths of 1.5m, 2m or 4m
