

# PROTECTAFOAM

Protectafoam is ideal to warn and protect people from sharp edges, low ceilings, cupboards and machinery. Manufactured from recycled, flexible, polyurethane foam, sealed in a tight water-resistant skin. The product ensures corners, edges and dangerous spots are made visible due to the coloured strips.

- Manufactured from CFC free polyurethane foam
- Available in black/yellow, red/white, black and luminescent depending on the profile required
- Profile A,C,D & E are self-adhesive for clean, grease-free surfaces
- Profile B can be fitted with or without an adhesive
- Standard lengths are 1m
- Resistant to temperatures from - 40°C to + 100°C

Profile A

This product is suitable for industrial staircases (indoor and outdoor). The hand rail is flexible, self-adhesive and can be fixed permanently. The surface of the rail is sealed, resistant to scratches and easily cleaned.

Profile F - Staircase handrail

Profile E is suitable for use on small vehicles, lifting equipment etc. for light impact protection. This profile is manufactured on a 10m roll in black or black/yellow chevrons. (Red/white can be made to customer requirements).

Profile C
