

Sentree™ mesh tree guards offer a versatile method for protecting young trees from animals ranging from rabbits to deer. Manufactured from high density polyethylene, Sentree™ tree guards have the ability to form a large range of guards from 600mm to 1.8m high, and in various diameters.

Sentree™ tree guards are easy to install, and can be supplied in roll form or as cut pieces for on-site installation. The Sentree™ range offers much more flexibility than pre-formed tree shelters and allows the tree to grow in its natural climate without inhibiting sunlight or rainfall, ensuring a far higher percentage of growth and lower mortality rates.

- Manufactured from HDPE
- UV stabilised and rot resistant
- Allows the tree to breathe naturally
- Manufactured in black, brown or green
- Various heights and diameters available
- Can be cut into pieces of the required size

Sentree™ tree guards 2 & 6 are also available in green / brown. All other tree guards can be manufactured in other colours subject to minimum manufacturing quantities.

SENTREE™ 1

Heavy duty mesh, ideal protection against deer damage

- Formed into guards of any height with a fixed diameter of 140mm (approx)
- Roll size: 450mm x 50mtrs
- Mesh Aperture: 37mm x 23mm

SENTREE™ 2

High quality mesh, ideal protection against rabbits. Smooth top minimises bark abrasion

- Formed into guards with a height of 600mm with a variable diameter
- Roll size: 600mm x 50mtrs
- Mesh Aperture: 13mm x 13mm

SENTREE™ 6

High quality mesh, ideal protection against most animals. Smooth top minimises bark abrasion

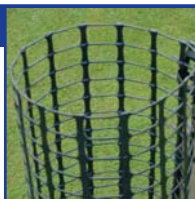

- Formed into guards with a height of 1.2mtrs with a variable diameter
- Roll size: 1.2mtrs x 50mtrs
- Mesh Aperture: 13mm x 13mm

SENTREE™ 3

Heavy duty mesh. A wide diameter ensures it is an ideal protection for shrubs

- Formed into guards with a height of 1000mm with a variable diameter
- Roll size: 1mtr x 50mtrs
- Mesh Aperture: 45mm x 25mm

SENTREE™ 9

High quality fine mesh guard, supplied as a layflat tube on a roll.

- Formed into guards of a variable height with a fixed diameter of 120mm
- Roll size: 120mm dia. x 100mtrs
- Mesh Aperture: 2mm x 2mm
- Weight: 110g/lm

Technical Specifications
