

ALUMINIUM FOIL

A printed coloured plastic strip of detectable aluminium foil tape, permanently bonded between two layers of rot resistant plastic to prevent corrosion and increase its tensile strength.

- Available in many colours.
- All 50mm tapes are boxed in dispenser cartons.
- Easily located by direct connection
- Continuous metallic tracer element.

STEEL STRIP

Detectatape® Steel Strip is manufactured from rot resistant polyethylene and bonded with a 10mm wide annealed stainless steel strip - 2B finish, which conforms to BS1449 PT2 1983 316 s 31, and is not less than 0.1mm thick. When buried, the steel strip has contact with the earth for its entire length maximising the potential for inductive location. All rolls are supplied on a dispenser drum.
